
**GIS-BASED GROUND WATER RESOURCES EVALUATION OF
THE CRYSTAL RIVER AND WEST SOPRIS CREEK (CRWS)
STUDY AREA, PITKIN COUNTY, COLORADO**

By:

**Dr. Kenneth E. Kolm
Hydrologic Systems Analysis, LLC.
Golden, Colorado**

**Paul K.M. van der Heijde
Heath Hydrology, Inc.
Boulder, Colorado**

**Marieke Dechesne
Boulder, Colorado**

for:

**Pitkin County
Board of County Commissioners
Colorado**

Contract No. 132-2007

August 22, 2008

Table of Contents

1. Introduction	1
1.1 Availability, Sustainability, Vulnerability, and Augmentation	2
1.2 Project Approach	5
2. Development of Conceptual Models of the Crystal River and West Sopris Creek (CRWS) Study Area	7
2.1 Climate	7
2.2 Topography and Geomorphology	9
2.3 Surface Water Characteristics	10
2.4 Hydrogeologic Framework	12
2.4.1 Crystal River Study Area	13
2.4.2 West Sopris Creek Study Area	17
2.5 Ground Water Flow System	18
2.6 Conceptual Ground Water System Models	19
2.6.1 Upper Crystal River (UCR) Subsystem	19
2.6.2 Central Crystal River and Redstone (CCR) Subsystem	22
2.6.3 Lower Crystal River (LCR) Subsystem	27
2.6.4 West Sopris Creek (WSC) Subsystem	32
2.6.5 Thompson & Coal Creek (TCC) Subsystem	35
2.7 Anthropogenic Influences	42
2.8 Summary and Discussion	43
3. GIS Map, Layers, and Data Sources	47
3.1 GIS and GIS Maps	47
3.2 Use of GIS in the CRWS Study	47
3.3 GIS Map, Layers, and File Structure	49
3.4 Data Sources	51
4. Ground Water Resources Evaluation Procedure	60
4.1 Potential Availability of Ground Water for Water Supply	60
4.1.1 Potential Unconfined Surficial Aquifer Material in Study Area	62
4.1.2 Potential Unconfined and Confined Bedrock Aquifer Material	63
4.1.3. Is the Potential Surficial Aquifer Connected/Not Connected with a Bedrock Aquifer?	66
4.1.4 Is Alluvial/Colluvial Material Saturated or Unsaturated?	66
4.2 Potential Sustainability of a Ground Water Supply from Ground Water	66
4.2.1 Is There Direct Infiltration of Precipitation into the Alluvial/Colluvial Aquifer or the Bedrock Aquifer, and How Much?	67
4.2.2 Is the Alluvial/Colluvial Aquifer Connected/Not Connected with a Perennial Stream?	67

4.2.3 Is the Alluvial/Colluvial Aquifer Connected with an Irrigation Ditch or Subject to Return Flow of Irrigation Water?	67	
4.3 Vulnerability of Ground Water Supplies to Contamination from the Surface	68	
5. Case History Examples	69	
5.1 Example 1 in the Upper Crystal River Valley	70	
5.1.1 Identify Location on GIS Map	70	
5.1.2 Determine Ground Water Availability	71	
5.1.3 Determine Ground Water Sustainability	74	
5.1.4 Determine Ground Water Vulnerability	76	
5.2 Example 2 in the Central Crystal River Valley	77	
5.2.1 Identify Location on GIS Map	77	
5.2.2 Determine Ground Water Availability	78	
5.2.3 Determine Ground Water Sustainability	81	
5.2.4 Determine Ground Water Vulnerability	83	
5.3 Example 3 in the Lower Crystal River Valley	83	
5.3.1 Identify Location on GIS Map	83	
5.3.2 Determine Ground Water Availability	83	
5.3.3 Determine Ground Water Sustainability	85	
5.3.4 Determine Ground Water Vulnerability	88	
5.4 Example 4 in the West Sopris Creek Watershed	89	
5.4.1 Identify Location on GIS Map	89	
5.4.2 Determine Ground Water Availability	90	
5.4.3 Determine Ground Water Sustainability	92	
5.4.4 Determine Ground Water Vulnerability	94	
6. Conclusions and Recommendations	95	
6.1 General Recommendations	96	
6.2 Recommendations by Site	96	
7. References	99	
Appendix 1	Climate Data for Basalt and Redstone, Colorado	A1
Appendix 2	Data Fields of the Well Database of the Colorado Division of Water Resources	A3
Appendix 3	Update Procedures for GIS Databases	A11
Appendix 4	Summary of Stepwise Approach to Assessing Ground Water Availability, Sustainability, and Vulnerability in the CRWS Study Area, Pitkin County, Colorado	A13

List of Tables

Table 1	Correlation of Geological, Hydrogeological and Hydrostructural Units in the CRWS Study Area	15
Table A.1.1	Monthly Climate Summary for Basalt, Colorado [station 050514] for period 7/1/1965 to 5/31/1972	A1
Table A.1.2	Monthly Climate Summary for Basalt, Colorado [station 050514] for period 1/1/1971 to 12/31/2000	A1
Table A.1.3	Monthly Climate Summary for Redstone, Colorado [station 056970] for period 6/1/1979 to 6/30/1994	A2
Table A.1.4	Monthly Climate Summary for Redstone, Colorado [station 056970] for period 1/1/1971 to 12/31/2000	A2
